

ENVIRONMENTAL POLICY

ReNu Energy Limited is committed to the effective environmental management of all its investment and operating activities, while at the same time ensuring minimal social impact for the benefit of present and future generations.

Our vision is to become a world class clean technology company creating shareholder and customer value by harnessing innovation to supply clean energy products and sustainable services. To achieve this, we will:

- Maintain and continually improve the Environment Management System across the organisation.
- Comply with all relevant laws, regulations and standards and aspire to higher standards within the business.
- Ensure that all employees and contractors receive appropriate training to fulfil their individual environmental responsibilities.
- Ensure that we have the necessary resources and skills to achieve our environmental commitments.
- Implement strategies to minimise pollution, manage waste effectively, use water and energy efficiently and address relevant cultural heritage and biodiversity issues.
- Formally monitor, audit, review and report annually on our environmental performance against defined objectives.
- Require that companies providing contract services to ReNu Energy manage their environmental performance in line with this Policy.
- Work towards the achievement of a high level of external recognition for the quality of our on-site environmental management.

ReNu Energy is committed to providing the resources and support required for the achievement of best practice and the ongoing improvement of environmental management at all of our sites.
