

## ENVIRONMENTAL POLICY

As an investor in renewable and clean energy project and technologies, environmental sustainability is at the heart of every activity ReNu Energy undertakes.

ReNu Energy is committed to:

- Maintaining and continually improving the Environment Management policy and procedures across the organisation
- Complying with all relevant laws, regulations and standards and aspiring to higher standards within the business
- Ensuring that all employees and contractors receive appropriate training to fulfil their individual environmental responsibilities
- Ensuring that we have the necessary resources and skills to achieve our environmental commitments
- Implementing strategies to minimise pollution, manage waste effectively, use water and energy efficiently and address relevant cultural heritage and biodiversity issues
- Formally monitor, audit, review and report annually on our environmental performance against defined objectives
- Require that companies providing contract services to ReNu Energy manage their environmental performance in line with this policy
- Work towards the achievement of a high level of external recognition for the quality of our on-site environmental management

ReNu Energy will provide the resources and support required to meet these policy commitments.
